DETAILED ACTION

Prosecution History Summary

Claims 1-5, 14-15, 20-30, and 33 are canceled.

Claims 6-13, 16-19, and 31-32 are pending and allowed as set forth below.

Examiner's Comment

Regarding the withdrawal of the rejection set forth on page 4 of the action mailed 10/12/2007, Applicant's arguments on pages 11-12 of the remarks not that the various sections as claimed are indeed statutory. From these remarks and the passages noted from Applicant's specification therein, it is clear that applicant's claims are not directed to disembodied data structures or software per se, and, in fact, that the claimed apparatus and accompanying sections are indeed the combination of hardware and software configured to perform various tasks. Thereby, claims 6 and 31 represent statutory subject matter and the rejection under 35 USC 101 has been withdrawn.

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the Title

The title has been amended to read as follows:

--Method and Apparatus for customer information control--

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

Upon review of the evidence at hand, it is hereby concluded that the evidence obtained and made of record, alone or in combination, neither anticipates, reasonably teaches, nor renders obvious the below noted features of applicant's invention as the noted features amount to more than a predictable use of elements in the prior art. The allowable features are as follows:

Regarding independent claims 6 and 16, and the related dependent claims, the prior art fails to teach or render obvious *wherein the customer information comprises a customer address; the memory section stores the individual e-mail address as a pair with a customer address; and the checking section examines the destination address and a sender address of an email message to effect the second act, to determine whether the destination address and the sender address of the email message to effect the second act are in agreement with the individual e-mail address and the customer address stored as a pair in the memory section.*

Regarding independent claims 31 and 32, the prior art fails to teach or render obvious *memorizing the first individual e-mail address in pair with the first customer's address and determining whether the destination address of the subsequent electronic message is identical with the first individual e-mail address and at the same time a sender address of the subsequent e-mail message is identical with the first customer's address or whether the destination address of the subsequent electronic message is identical with the second individual e-mail address and at the same time the sender address of the subsequent e-mail message is identical with the second customer's address.*

In addition to the above, the Examiner emphasizes the interrelation of the above distinguishing elements with the remainder of each respective claim, and further notes that it is that interrelation that truly distinguishes Applicant's invention from the evidence at hand.

Thereby, it is asserted that, in light of the above and in further deliberation over all of the evidence at hand, that the claims are allowable as the evidence at hand does not anticipate the claims and does not render obvious any further modification of the references to a person of ordinary skill in the art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure but fails to remedy the deficiencies noted above:

Non-Patent Literature

- PTO 892 reference U teaches the use of DealerNet software for negotiations of automobile purchases via email
- PTO 892 reference V teaches GM's BuyPower, an online vehicle purchasing tool that facilitates email exchange
- PTO 892 reference W teaches where prospective car buyers can access the DealerNet service simply by logging onto the Internet in order to carry out the negotiation through electronic mail
- PTO 892 reference X teaches Toyota's online sales which include utilizing email to contact sales representatives and being negotiations
